Plug In Electric Vehicles in Smart Grids Jan 10 2022 This book focuses on the state of the art in worldwide research on applying optimization approaches to intelligently control charging and discharging of batteries of Plug-in Electric Vehicles (PEVs) in smart grids. Network constraints, cost considerations, the number and penetration level of PEVs, utilization of PEVs by their owners, ancillary services, load forecasting, risk analysis, etc. are all different criteria considered by the researchers in developing mathematical based equations which represent the presence of PEVs in electric networks. Different objective functions can be defined and different optimization methods can be utilized to coordinate the performance of PEVs in smart grids. This book will be an excellent resource for anyone interested in grasping the current state of applying different optimization techniques and approaches that can manage the presence of PEVs in smart grids.

Extracellular Vesicle-Mediated Processes in Cardiovascular Diseases Feb 17 2020 It is long known that many cells can shed extracellular vesicles, small membrane-enclosed cell fragments. Although the existence of extracellular vesicles has been recognized for many years, researchers are only beginning to understand their physiologic significance. Several recent studies have demonstrated that extracellular vesicles released from cells serve as a mode of cellular communication. They can carry diverse molecular payload (e.g. nucleic acids, bioactive lipids and proteins) to distal organs and recipient cells. Extracellular vesicles can be classified into three major groups: exosomes, microvesicles, and apoptotic bodies. All these types of extracellular vesicles can be found in a variety of biologic specimen and their numbers, distribution and composition may serve as biomarkers for various disorders, including cardiovascular disease. Although extracellular vesicle-mediated processes are currently best characterized in the fields of cancer biology

and neurobiology, evidence is accumulating that extracellular vesicles play a key role in the pathophysiology of diabetes, thrombosis, inflammation and cardiovascular calcification. In this Research Topic, we invited review and methodological articles that advance our understanding of extracellular vesicle-related processes in vascular biology.

service Nov 08 2021 In 1998, the Council of Europe and the European Commission decided to take common action in the field of youth. Both institutions initiated a partnership agreement with the aim "to promote active European citizenship and civil society by giving impetus to the training of youth leaders and youth workers working within a European dimension". In 2003, additional agreements were signed in the fields of "youth research" and "Euro-Mediterranean youth co-operation". Since 2005, the partnership between the European Commission and the Council of Europe in the field of youth activities has focused on the following topics: European citizenship, human rights education and intercultural dialogue, quality and recognition of youth work and training, better understanding and knowledge of youth and youth policy development. The partnership between the European Commission and the Council of Europe in the field of youth brings together the two institutions' experience in non-formal education, youth policy, youth research and youth work practice. Activities organised within its framework gather representatives of those areas who share their knowledge and experience for the benefit of enhancing evidence-based policy, practice, quality and recognition of youth work and training. Results and other material are made available on the partnership website (<http://youth-partnership-eu.coe.int>) and in various publications, including the Training Kits (T-Kits). T-Kits are thematic publications written by experienced youth trainers and experts and constitute easy-to-use handbooks for educational activities. All activities and publications enhance the exchange of experience and good practice between the actors involved and contribute to the implementation of the political objectives of both partner institutions.
