The course offers: - an approach centred around the whole educational context of learning English at school - links across the school curriculum to other subject areas throughout the course - content and concepts related to learners' ages and levels of ability - an organisation which takes into account the realities of teaching English at school: mixed abilities, mixed motivation, time available, and class size - material which has been developed and successfully piloted in collaboration with teachers and classes in Poland - opportunities to link up with classes in other countries through the Parcel of English scheme The course consists of four levels. Level 3 is suitable for students who have studied at elementary level and takes students through to low- intermediate. All levels include bilingual Language summaries and word lists. This book explains why some Korean high school students sleep during English classes in spite of the emphasized value of English in their society. It examines how this sleeping-in-class phenomenon can be understood by means of such marginalized students' emic outlooks on themselves, the target language, their teachers, schools, and society/culture; and by means of the views of teachers who have experienced such in-class sleepers. To understand the phenomenon more holistically, it pursues a multi-disciplinary approach drawing on studies of demotivation and amotivation, psychological needs, and student experiences of schooling, as well as sociocultural theories of learning and agency and of interpersonal dynamics, among others. On the basis of a multi-modal analysis of interview data from the student and teacher participants, it theoretically interprets the phenomenon at the classroom ('micro-'), school ('meso-') and society-culture ('macro-') levels. Taking a humanistic/existential approach to education, it subsequently presents a number of cultural actions that it advocates implementing in a situation-sensitive manner to help in-class sleepers and their educational institutions awaken from their chronic slumber. Lastly, it presents practical and theoretical implications for more humanistic pedagogy, and global studies of student disengagement, in English-as-a-foreign-language classes. What are the key debates in English teaching today? Debates in English Teaching explores the major issues all English teachers encounter in their daily professional lives. It engages with established and contemporary debates, promotes and supports critical reflection and aims to stimulate both novice and

experienced teachers to reach informed judgements and argue their point of view with deeper theoretical knowledge and understanding. Key issues debated include: the professional identity of English teachers attitudes to correctness in grammar and standard English the importance of the media and new technologies social class and literacy the nature of the dialogic classroom the role of wider reading the politics of early literacy. With its combination of expert opinion and fresh insight, *Debates in English Teaching* is the ideal companion for all student and practising teachers engaged in initial training, continuing professional development and master's level study. This engaging volume on English as an Additional Language (EAL), argues persuasively for the importance of critical participatory pedagogies that embrace multilingualism and multimodality in the field of TESOL. It highlights the role of the TESOL profession in teaching for social justice and advocacy and explores how critical participatory pedagogies translate into English language teaching and teacher education around the world. Bringing together diverse scholars in the field and practicing English language teachers, editors Polina Vinogradova and Joan Kang Shin present 10 thematically organized units that demonstrate that language teaching pedagogy must be embedded in the larger sociocultural contexts of teaching and learning to be successful. Each unit covers one pedagogical approach and includes three case studies to illustrate how English language teachers across the world implement these approaches in their classrooms. The chapters are supplemented by discussion questions and a range of practical sources for further exploration. Addressing established and emerging areas of TESOL, topics covered include: Critical and postmethod pedagogies Translingualism Digital literacy and multiliteracies Culturally responsive pedagogy Advocacy Featuring educators implementing innovative approaches in primary, secondary, and tertiary contexts across borders, *Contemporary Foundations for Teaching English as an Additional Language* is an ideal text for methods and foundational courses in TESOL and will appeal to in-service and preservice English language teachers as well as students and teacher educators in TESOL and applied linguistics. The *Enrich English Course* is a modern and challenging course, designed to expose learners to real-life situations that enable them to experience and respond to language in different scenarios. The books aim at the development of communicative proficiency through a graded syllabus of structural patterns, and the rich and varied contexts of English literature. In telling the story of cricket from the bottom up, *Different Class* demonstrates how the "quintessentially English" game has done more to divide, rather than unite, the English. In 1963, the West Indian Marxist C.L.R. James posed the deceptively benign question: "What do they know of cricket, who only cricket know?" A challenge to the public to re-consider cricket and its meaning by placing the game in its true social, political and economic context, James was, all too subtly, attempting to counter the game's orthodox history that, he argued, had played a key role in the formation of national culture. As a consequence, he failed, and the history of cricket in England has retained the same stresses and lineaments as it did a century ago —

until now. In examining recreational rather than professional (first-class) cricket, *Different Class* does not simply challenge the widely accepted orthodoxy of English cricket, it demonstrates how the values and belief systems at its heart were, under the guise of amateurism, intentionally developed in order to divide the English along class lines at every level of the game. If the creation of opposing class-based cricket cultures in the North and South of England grew out of this process, the institutional structures developed by those in charge of English cricket continue to discriminate. But, as much as the exclusion of Black and South Asian cricketers from the recreational mainstream is the most obvious example, it is social class that remains the greatest barrier to participation in what used to be the national game. Practical ideas are provided for a wide variety of language practice activities. By Sarah Phillips. Part of the Primary Resource Books for Teachers series.
