Case Studies in Crisis Communication Sep 02 2021 Case Studies in Crisis Communication: International Perspectives on Hits and Misses was created to fill the gap for a much-needed textbook in case studies in crisis communication from international perspectives. The events of September 11, 2001, other major world crises, and the ongoing macroeconomic challenges of financial institutions, justify the need for this book. While existing textbooks on the subject focus on U.S. corporate cases, they may not appeal equally to students and practitioners in other countries, hence the need to analyze cases

from the United States and from other world regions. The variety and the international focus of the cases, be they environmental, health or management successes or failures, makes this book more appealing to a wider audience. These cases examine socio-cultural issues associated with responding to a variety of crises.

The Situated Organization Aug 01 2021 The Situated Organization explores recent research in organizational communication, emphasizing the organization as constructed in and emerging out of communication practices. Working from the tradition of the Montreal School in its approach, it focuses not only on how an organization's members understand the purposes of the organization through communication, but also on how they realize and recognize the organization itself as they work within it. The text breaks through with an alternative viewpoint to the currently popular idea of 'organization-as-network,' viewing organization instead as a configuration of agencies, and their fields of practice. It serves as an original, comprehensive, and well-written text, elaborated by case studies that make the theory come to life. The substantial ideas and insights are presented in a deep and meaningful way while remaining comprehensible for student readers. This text has been developed for students at all levels of study in organizational communication, who need a systematic introduction to conducting empirical field research. It will serve as an invaluable sourcebook in planning and conducting research.

Exemplification in Communication Aug 21 2020 This volume offers a new conceptual framework for exemplification, a coherent theoretical approach based on contemporary psychological models of information processing, and an exhaustive integration of the pertinent research demonstrations. Focus is on the news media, but

the influence of fiction and quasi-fiction is also considered. The informational competition between concrete, verbal, or pictorial exemplification and abstract, mostly quantitative exposition is analyzed. Implications for issue perception, including delayed consequences are also examined. Exemplification is subjected to conceptual scrutiny and a new theoretical framework is offered. Contemporary psychological paradigms are applied to predict effects of various forms of exemplification. Perhaps most important, novel experimental research is presented to document the specific consequences of exemplifications featured in the news, even of those featured in fiction. Finally, recommendations for information providers and recipients are derived from the research demonstration in order to advance media literacy specific to exemplification. This unique volume: * provides a comprehensive account of the power of case-report selection in the manipulation of perceptions of social issues, * addresses exemplification in communication, i.e., the influence of case reports in the news media, primarily, on the perception of pertinent social issues, * offers an empirical assessment of the practice of issue exemplifying by the media, * gives an exhaustive account of representative research on exemplification effects on issue perception--primarily by the news media, but also by the entertainment media, and * includes a compilation of guidelines for information providers and recipients in efforts at creating media literacy with regard to exemplification.
