In each volume, the entities are now listed from benign to malignant and are described under an updated set of headings, including histopathology, diagnostic molecular pathology, staging, and easy-to-read essential and desirable diagnostic criteria. Who should read this book? * Pathologists * Oncologists * Respiratory physicians * Thoracic radiologists * Cancer researchers * Surgeons * Epidemiologists * Cancer registrars This volume: * Prepared by 217 authors and editors * Contributors from around the world * More than 1000 high-quality images * More than 3500 references "This is the best Norton Critical Edition yet! All my students have become intensely interested in reading Conrad—largely because of this excellent work." —Elise F. Knapp, Western Connecticut State University This Norton Critical Edition includes: - A newly edited text based on the first English book edition (1902), the last version to which Conrad is known to have actively contributed. "Textual History and Editing Principles" provides an overview of the textual controversies and ambiguities perpetually surrounding Heart of Darkness. - Background and source materials on colonialism and the Congo, nineteenth-century attitudes toward race, Conrad in the Congo, and Conrad on art and literature. - Fifteen illustrations. - Seven contemporary responses to the novella along with eighteen essays in criticism—ten of them new to the Fifth Edition, including an entirely new subsection on film adaptations of Heart of Darkness. - A Chronology and an updated Selected Bibliography. Dementia represents a major public health challenge for the world with over 100 million people likely to be affected by 2050. A large body of professionals is active in diagnosing, treating, and caring for people with dementia, and research is expanding. Many of these specialists find it hard to keep up to date in all aspects of dementia. This book helps solve that problem. The new edition has been updated and revised to reflect recent advances in this fast-moving field. Digestive System Tumours is the first volume in the fifth edition of the WHO series on the classification of human tumors. This series (also known as the WHO Blue Books) is regarded as the gold standard for the diagnosis of tumors and comprises a unique synthesis of histopathological diagnosis with digital and molecular pathology. These authoritative and concise reference books provide indispensable international standards for anyone involved in the care of patients with cancer or in cancer research, underpinning individual patient treatment as well as research into all aspects of cancer causation, prevention, therapy, and education. The book is a collection of high-quality peer-reviewed research papers presented at International Conference on Frontiers of Intelligent Computing: Theory and applications (FICTA 2016) held at School of Computer Engineering, KIIT University, Bhubaneswar, India during 16 – 17 September 2016. The book presents theories, methodologies, new ideas, experiences and applications in all areas of intelligent computing and its applications to various engineering disciplines like computer science, electronics, electrical and mechanical engineering. This is primarily a textbook for graduate and upper-level undergraduate students of law. However, practising lawyers and policy-makers who are looking for an introduction to WTO law will also find it invaluable. The book covers both the institutional and substantive law of the WTO. While the treatment of the law is often quite detailed, the main aim of this textbook is to make clear the basic principles and underlying logic of WTO law and the world trading system. Each section contains questions and assignments, to allow students to assess their understanding and develop useful practical skills. At the end of each chapter there is a helpful summary, as well as an exercise on specific, true-to-life international trade problems. Provides new perspectives on the dynamic interplay of global, national, and local forces as they shape the functions and outcomes of education systems. The book calls for a rethinking of the nation-state as the basic unit for analyzing school-society relations and emphasizes the need to study social movements in relation to educational reforms.
