result. Keeping Smart Hard Work philosophy in mind, we have designed this book. As time plays an important factor & is limited in competitive
exams hence the magic to score high in such examination is to solve questions accurately with speed. The ability to solve lengthy questions
accurately in the shortest possible time will fetch you lead over other students resulting not only into good marks but also top rank. And the Short
Tricks is sure to make it happen. For this purpose, we are elated to present a compilation of Short Tricks of Mathematics in a book form. These
tricks have the edge which can make any aspirant solve questions accurately & quickly. The Classic Texts Series is the only of its kind selection
of classic pieces of work that started off as bestseller and continues to be the bestseller even today. These classic texts have been designed so as to
work as elementary textbooks which play a crucial role in building the concepts from scratch as in-depth knowledge of concepts is necessary for
students preparing for various entrance exams.The present book on Higher Algebra presents all the elements of Higher Algebra in a single book
meant to work as textbook for the students beginning their preparation of the varied aspects covered under Higher Algebra. The present book has

been divided into 35 chapters namely Ratio, Proportion, Variation, Arithmetical Progression, Geometrical Progression, Harmonical Progression Theorems Connected with The Progression, Scales of Notation, Surds & Imaginary Quantities, The Theory of Quadratic Equations, Miscellaneous Equations, Permutations & Combinations, Mathematical Induction, Binomial Theorem Positive Integral Index, Binomial Theorem, Any Index, Multinomial Theorem, Logarithms, Exponential & Logarithmic Series, Interest & Annuities, Inequalities, Limiting Values & Vanishing Fractions, Convergence & Divergency of Series, Undetermined Coefficients, Partial Fractions, Recurring Series, Continued Fractions, Recurring Series, Continued Fractions, Indeterminate Equations of the First Degree, Recurring Continued Fractions, Indeterminate Equations of the Second Degree, Summation of Series, Theory of Numbers, The General Theory of Continued Fractions, Probability, Determinants, Miscellaneous Theorems & Examples and Theory of Equations, each subdivided into number of topics. The first few chapters in the book have been devoted to a fuller discussion of Ratio, Proportions, Variation and the Progressions. Both the theoretical text as well as examples have been treated minutely which will help in better understanding of the concepts covered in the book. Theoretical explanation of the concepts in points has been provided at the beginning of each chapter. At the end of each chapter, unsolved practice exercises have been provided to help aspirants revise the concepts discussed in the chapter. At the end of chapterwise study, miscellaneous examples have also been given along with answers and solutions to the unsolved examples covered in each chapter. All the relevant theorems covered under the syllabi of Higher Algebra have also been covered in the detail in this book. As the book covers the whole syllabi of Higher Algebra in detail along with ample number of solved examples, it for sure will help the students perfect the varied concepts covered under the Higher Algebra section. "Bring conceptual clarity and develop the skills to approach any unseen problem, step by step." - HC Verma "Great Book to read and understand! Quality explanations and methodical approach separates this book from the rest. A clear winner in its category." - Review on Amazon "Must have book for every IIT JEE aspirant! There are many solution books available in the market but this book is a class apart. Solutions are explained in detail. In many questions there are extra points which are beneficial for aspirants." - Review on Amazon Written by IITians, foreword by Dr HC Verma and appreciated by students as well as teachers. Two IITians have worked together to provide a high quality Physics problem book to Indian students. It is an indispensable collection of previous 41 years IIT questions and their illustrated solutions for any serious aspirant. The success of this work lies in making the readers capable to solve complex problems using few basic principles. The readers are also asked to attempt variations of the solved problems to help them understand the concepts better. The students can use the book as a readily available mentor for providing hints or complete solutions as per their needs. Key features of the book are: - Concept building by problem solving. The solutions reveals all the critical points. - 1400+ solved problems from IIT JEE. The book contains all questions and their solutions. - Topic-wise content arrangement to enables IIT preparation with school education. - Promotes self learning. Can be used as a readily available mentor for solutions. This collection of essays on the worldviews of the people in Malaysia focuses on the three main ethnic groups - the Malays, Chinese and Indians - as well as the indigenous peoples of Sabah. Topics include the Islamic worldview of Man, society and nature, the traditional Malay socio-political outlook, the language and worldview of the Malay peasants, as well as Malaysian folk-tales and drama. The worldview of social belonging among the Chinese and Indians, and the traditional worldviews of the indigenous peoples of Sabah are also presented. It is common knowledge that, in rich societies, the poor have worse health and suffer more from almost every social problem. This book explains why inequality is the most serious problem societies face today. Becoming globally urban has been one of mankind's greatest collective achievements over time. Written by leading scholar, this is the first detailed survey of the world's cities and towns from ancient times to the present day. The varied and colorful career of Charles Wesley Allen (1851-1942) took him throughout the northern Plains during an exceptionally turbulent era in its history. He was at the Red Cloud Agency when Red Cloud attempted to prevent the raising of the American flag and the Lakota nearly took over the agency. Allen also visited Deadwood at the height of the Black Hills gold rush, helped build the first government agency on the Pine Ridge reservation, and reported on the Lakota Ghost Dance. Allen happened to be walking through the Indian camp at Wounded Knee when shots rang out on December 29, 1890, and his is arguably the best of all the eyewitness accounts of that tragedy. ø This is Allen's previously

unpublished vivid account of the years he described as "the most exciting chapter of my life." As much the chronicle of the passing of an era as a personal narrative, its simple, direct, and often moving prose captures the injustices, gritty details, and relentless energy of a period of dramatic change in the West. Key Features: Covers problems of real life situations to develop learners' problem solving skills. Ideal for students willing to sharpen their engineering aptitude. Graded problems to suit average as well as high level students. About the Book: The book is an excellent classic on physics having relevance for the students of physical science at the senior secondary and undergraduate levels. It presents the problems with The related concepts at length under six core sections. For the ease of students appropriate formulae are given in each section. All difficult problems are explained in a lucid manner. The answers to all the problems are given at the end of the book.
