These papers are popular among students who intend to go to top grammar schools such as the schools in Sutton, Bexley, etc.. These papers were prepared by a professional who works closely with a number of 11+ mock exams in London. Each paper contains 50 novel and challenging maths questions with answers. In total, there are 200 questions - answers are provided in the back of the book. Students are expected to finish each paper within 50 minutes. If a student can get around 38 to 45 correct answers for each paper the student has a great chance of scoring a very good mark in school's selective eligibility exams. Why are these papers so expensive? These papers are prepared to challenge the students who are at borderline to go to top grammar schools. These papers contain challenging questions that you wouldn't find in any of the books/papers you may get from high street. These papers are unique and reflect the questions tested by popular and competitive grammar schools in recent years. Using these unseen papers at home and marking will immensely helpful and put your child on the edge compared to others. Exposing challenging questions like the questions in this paper set will avoid surprise to your child during the real exam. A radically different new concept in exam preparation, providing individual on-line evaluation and vital access to peer group comparison. The First Past the Post Practice papers series is a leading-edge new product for 11+ exam preparation formulated by on-line market leader ElevenPlusExams. There is no national syllabus for the 11+ exam, no pass mark and no retake option. Unlike conventional exams it's always been examined on a first past the post principle. This is where the 11+ Peer-Compare system comes in: the key to success or failure is how the student performs against peers. This book is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge colleges as the basis for conditional offers. They are also used by Warwick University, and many other mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics is recommended as preparation for any undergraduate mathematics course, even for students who do not plan to take the Sixth Term Examination Paper. The questions analysed in this book are all based on recent STEP questions selected to address the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. Each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anybody interested in advanced mathematics.
