*Cultures of Law in Urban Northern Europe* Feb 28 2021

Drawing together an international team of historians, lawyers and historical sociolinguists, this volume investigates urban cultures of law in Scotland, with a special focus on Aberdeen and its rich civic archive, the Low Countries, Norway, Germany and Poland from c. 1350 to c. 1650. In these essays, the contributors seek to understand how law works in its cultural and social contexts by focusing specifically on the urban experience and, to a great extent, on urban records. The contributions are concerned with understanding late medieval and early modern legal experts as well as the users of courts and legal services, the languages and records of law, and legal activities occurring inside and outside of official legal fora. This volume considers what the expectations of people at different status levels were for the use of the law, what perceptions of justice and authority existed among different groups, and what their knowledge was of law and legal procedure. By examining how different aspects of legal culture came to be recorded in writing, the contributors reveal how that writing itself then became part of a culture of law. Cultures of Law in Urban Northern Europe: Scotland and its Neighbours c.1350-c.1650 combines the historical study of law, towns, language and politics in a way that will be accessible and compelling for advanced level undergraduates and postgraduate to postdoctoral researchers and academics in medieval and early modern, urban, legal, political and linguistic history.

**Law and Opinion in Scotland during the Seventeenth Century** Apr 13 2022 In Britain at least, changes in the law are expected to be made by the enactment of statutes or the decision of cases by senior judges. Lawyers express opinions about the law but do not expect their opinions to form part of the law. It was not always so. This book explores the relationship between the opinions expressed by lawyers and the development of the law of Scotland in the century preceding the parliamentary union with England in 1707, when it was decided that the private law of Scotland was sufficiently distinctive and coherent to be worthy of preservation. Credit for this surprising decision, which has resulted in the survival of two separate legal systems in Britain, has often been given to the first Viscount Stair, whose Institutions of the Law of Scotland had appeared in a revised edition in

1693. The present book places Stair's treatise in historical context and asks whether it could have been his intention in writing to express the type of authoritative opinions that could have been used to consolidate the emerging law, and whether he could have been motivated in writing by a desire to clarify the relationship between the laws of Scotland and England. In doing so the book provides a fresh account of the literature and practice of Scots law in its formative period and at the same time sheds light on the background to the 1707 union. It will be of interest to legal historians and Scots lawyers, but it should also be accessible to lay readers who wish to know more about the law and legal history of Scotland

*The Tapestry of the Law* Jun 15 2022 Although its concern is jurisprudence, The Tapestry of the Law is intended to offer neither an original theory of or about law nor an account of other people's theories in textbook form. It is, rather, an attempt to approach the subject without following either of these conventions. The reasons are as follows. Those engaged in legal theory are prone to assert that one cannot properly understand the law unless one takes a jurisprudential approach - preferably their own - to it. Equally, those engaged in exposition of the law may counter that legal theory fails to pay adequate attention to actual law. There is at least some truth in these claims. Analyses, courses and textbooks on both sides do often seem to be produced without reference to the other. Yet such isolation is probably more apparent than real. Most, if not all, so-called "black letter" lawyers do operate on the basis of certain jurisprudential understandings, even if these are not articulated ones. In the frequently quoted words of F C S Northrop: There are lawyers, judges and even law professors who tell us they have no legal philosophy.
