In this fun and provocative page-turner, Michael Fanuele, one of the world's most successful marketing strategists, shares *The Six Skills of Inspiration*. With insights from music, politics, business, neuroscience, and a recipe for radishes, *Stop Making Sense* shares the creative blueprint that can unleash the inspiring leader in all of us. "If Brené Brown and Simon Sinek had a book baby together, you're

looking at it right now. Stop Making Sense is a new manual for learning true leadership. Fanuele's set of simple principles that changed my life over the last quarter century will change yours in a matter of hours."—Andrew Zimmern, chef, author, teacher, host and producer of Travel Channel's Bizarre Foods "Michael Fanuele shows us how our passion and emotion will take us farther than our logic ever can. I can't convince you to read this book, but I guarantee you'll be inspired by doing so."—Beth Comstock, author of Imagine It Forward and former vice chair, GE "This is the book we need now: a blueprint for leading with heart, passion, and imagination. Fanuele is such a fun and generous storyteller you almost don't realize that he's murdering so many small and cynical voices." —Andrew Essex, Co-founder, Plan A, author of The End of Advertising, former CEO, Droga5 and Tribeca Enterprises "This funny, swearsy, energetic, challenging book will push you into a whole new way to find that compelling inspiration we'd all secretly like 1000% more of."—Adam Morgan, author of Eating The Big Fish and A Beautiful Constraint and founder, eatbigfish "The best magic bends your brain, and that's exactly what Michael Fanuele does in Stop Making Sense. With wit and insight, he dismisses the myth that we have to wait for inspiration to strike. He reveals the secrets that can make any of us a muse, dazzling audiences and getting the very best out of our teams, families, and most

important, ourselves.”—David Kwong, magician, “The Enigmatist,” author of *Spellbound*, puzzle creator, and producer

? The music today known as “classic country” originated in the South in the 1920s. Influenced by blues and folk music, instrumentation was typically guitar, fiddle, bass, steel guitar, and later drums, with lyrics and arrangements rooted in tradition. This book covers some of the genre's legendary artists, from its heyday in the 1940s to its decline in the early 1970s. Revivalists keeping the traditions alive in the 21st century are also explored. Drawing on original interviews with artists and their associates, biographical profiles chronicle

their lives on the road and in the studio, as well as the stories behind popular songs. Thirty-six performers are profiled, including Ernest Tubb, Ray Price, Loretta Lynn, Bill Anderson, Faron Young, Mickey Gilley, Freddie Hart, Jerry Reed, Charley Pride, David Frizzell, The Cactus Blossoms, The Secret Sisters, and Pokey LaFarge. Chinese art has experienced its most profound metamorphosis since the early 1950s, transforming from humble realism to socialist realism, from revolutionary art to critical realism, then avant-garde movement, and globalized Chinese art. With a hybrid mix of Chinese philosophy, imported but revised Marxist ideology, and western humanities, Chinese artists have created an alternative approach – after a great ideological and aesthetic transition in the 1980s – toward its own contemporaneity though interacting and intertwining with the art of rest of the world. This book will investigate, from the perspective of an activist, critic, and historian who grew up prior to and participated in the great transition, and then researched and taught the subject, the evolution of Chinese art in modern and contemporary times. The volume will be a comprehensive and insightful history of the one of the most sophisticated and unparalleled artistic and cultural phenomena in the modern world. Hitting a ball with the hand (Handball) is the oldest sport known to mankind. It has been almost 100 years since handball was introduced as an intramural sport

at Texas A&M. This book connects a tie to those who helped handball along the way even before handball became a sport there and takes the reader through the years to the spring of 2022. Part of the history of handball is told in personal stories from those who have played at Texas A&M and the impact handball had on their lives and their lifetime achievements. Another part of the history includes a history of the Texas A&M courts, coaches, and Intramural Directors. With a rich history that has produced 26 players who have reached the All-American level and some who went on to become the world's best, this story needed to be recorded. This volume provides a snapshot of the current and future trends in turbulence research across a range of disciplines. It provides an overview of the key challenges that face scientific and engineering communities in the context of huge databases of turbulence information currently being generated, yet poorly mined. These challenges include coherent structures and their control, wall turbulence and control, multi-scale turbulence, the impact of turbulence on energy generation and turbulence data manipulation strategies. The motivation for this volume is to assist the reader to make physical sense of these data deluges so as to inform both the research community as well as to

advance practical outcomes from what is learned. Outcomes presented in this collection provide industry with information that impacts their activities, such as minimizing impact of wind farms, opportunities for understanding large scale wind events and large eddy simulation of the hydrodynamics of bays and lakes thereby increasing energy efficiencies, and minimizing emissions and noise from jet engines. Elucidates established, contemporary, and novel aspects of fluid turbulence - a ubiquitous yet poorly understood phenomena; Explores computer simulation of turbulence in the context of the emerging, unprecedented profusion of experimental data, which will need to be stewarded and archived; Examines a compendium of problems and issues that investigators can use to help formulate new promising research ideas; Makes the case for why funding agencies and scientists around the world need to lead a global effort to establish and steward large stores of turbulence data, rather than leaving them to individual researchers.

Alternatives to Democracy in Twentieth-Century Europe examines the historical examples of Soviet Communism, Italian Fascism, German Nazism, and Spanish Anarchism, suggesting that, in spite of their differences, they had some key features in common, in particular their shared hostility to individualism, representative government, laissez faire capitalism, and the decadence they associated with modern culture. But rather than seeking to return to earlier ways of working these movements and regimes sought to design a new future – an alternative future – that would restore the nation to spiritual and political health. The Fascists, for their part, specifically promoted palingenesis, which is to say the spiritual rebirth of the nation. The book closes with a long epilogue, in which Ramet defends liberal democracy, highlighting its strengths and advantages. In this chapter, the author identifies five key choke points,

which would-be authoritarians typically seek to control, subvert, or instrumentalize: electoral rules, the judiciary, the media, hate speech, and surveillance, and looks at the cases of Viktor Orbán's Hungary, Jarosław Kaczyński's Poland, and Donald Trump's United States. As the first of its kind, this book identifies major questions and challenges that will influence research on domain walls in the years to come. *Divided* looks at the last fifteen years in Saskatchewan, during which time the Saskatchewan Party government sought to reforge the province's image into the New Saskatchewan: brash, materialistic, highly competitive and aggressively partisan. In the process, a climate of polarization and hyper-partisanship swept the province into a near-perpetual state of anger and social division. These actions are not without consequences. In *Divided*, diverse voices describe the impact on their lives and communities when simmering wedge issues burst open on social media and in public spaces. The collection dives deep into the long set-up to this moment, from the colonial past to the four decades of neoliberal economics that have widened social and economic gaps across all sectors. *Divided* positions Saskatchewan as a fascinating case study of the global trends of division and provides testament to the resiliency of a vision of social solidarity against all odds. This book explores the dramatic evolution of a feminist movement that mobilised to challenge a women's prison system in crisis. Through in-depth historical research conducted in the Australian state of Victoria that spans the 1980s and 1990s, the authors uncover how incarcerated women have worked productively with feminist activists and community coalitions to expose, critique and resist the conditions and harms of their confinement. *Resisting Carceral Violence* tells the story of how activists—through a combination of creative direct actions, reformist lobbying and legal challenges—forged an anti-carceral feminist movement that traversed the prison walls. This powerful history provides vital lessons for service providers, social justice advocates and campaigners, academics and students

concerned with the violence of incarceration. It calls for a willingness to look beyond the prison and instead embrace creative solutions to broader structural inequalities and social harm. world that is made up of stuff, to which humans attach meaning. Think of the last time you watched a movie: the chair you sat in, the snacks you ate, the people around you, maybe the beer or joint you consumed to help you unwind—all this stuff shaped your experience of media and its influence on you. The material culture around film and television changes how we make sense of their content, not to mention the very concepts of the mediums. Focusing on material cultures of film and television reception, *The Stuff of Spectatorship* argues that the things we share space with and consume as we consume television and film influence the meaning we gather from them. This book examines the roles that six different material cultures have played in film and television culture since the 1970s—including video marketing, branded merchandise, drugs and alcohol, and even gun violence—and shows how objects considered peripheral to film and television culture are in fact central to its past and future. San Francisco has always been a city of transformation. From the nostalgic days of downtown shopping and grand movie palaces to newer buildings on the skyline and stunning neighborhood transformations, change has been a constant factor since the early days of European settlement in the late 1700s. Evidence of early San Francisco is still visible in the revitalized Ferry Building, repurposed as an artisan marketplace; in the celebrated neighborhood street fairs; and even in the

enduring edifices of commerce and industry. The city of the future has its roots firmly planted in a much-loved past. City native and local history author Frank Dunnigan showcases the old city as well as the new one gradually emerging. Fill your upcoming 2016, with 16 months of Classic Tractors all year round. What is the soundtrack for a nuclear war? During the Cold War, over 500 songs were written about nuclear weapons, fear of the Soviet Union, civil defense, bomb shelters, McCarthyism, uranium mining, the space race, espionage, the Berlin Wall, and glasnost. This music uncovers aspects of these world-changing events that documentaries and history books cannot. In *Atomic Tunes*, Tim and Joanna Smolko explore everything from the serious to the comical, the morbid to the crude, showing the widespread concern among musicians coping with the effect of communism on American society and the threat of a nuclear conflict of

global proportions. Atomic Tunes presents a musical history of the Cold War, analyzing the songs that capture the fear of those who lived under the shadow of Stalin, Sputnik, mushroom clouds, and missiles. An informed argument for an economic policy based on bridges of preparation and adaptation rather than walls of protection and exclusion “When technological change and globalization in recent decades brought frustration over the resulting losses to jobs and communities, there were no guardrails to get these workers back on track. As this compelling book shows, our nation is going to need bridges to help people get through the unavoidable transformations.”—Edmund Phelps, 2006 Nobel Laureate in Economics and author of *Mass Flourishing* Free-market economists often have noted that there are winners and losers in a competitive capitalist world. The question of how to deal with the difficult real-life consequences faced by the losers, however, has largely been ignored. Populist politicians have tried repeatedly to address the issue by creating walls—of both the physical and economic kinds—to insulate communities and keep competition at bay. While recognizing the broad emotional appeal of walls, economist Glenn Hubbard argues that because they delay needed adaptations to the ever-changing world, walls are essentially backward-looking and ultimately destined to fail. Taking Adam Smith’s logic to Youngstown, Ohio, as a case study in economic

disruption, Hubbard promotes the benefits of an open economy and creating bridges to support people in turbulent times so that they remain engaged and prepared to participate in, and reap the rewards of, a new economic landscape. This handbook reviews promising applications of psychedelics in treatment of such challenging psychiatric problems as posttraumatic stress disorder, major depression, substance use disorders, and end-of-life anxiety. Experts from multiple disciplines synthesize current knowledge on psilocybin, MDMA, ketamine, and other medical hallucinogens. The volume comprehensively examines these substances' neurobiological mechanisms, clinical effects, therapeutic potential, risks, and anthropological and historical contexts. Coverage ranges from basic science to practical clinical considerations, including patient screening and selection, dosages and routes of administration, how psychedelic-assisted sessions are structured and conducted, and management of adverse reactions. "An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable, demonstrating how we can restore function and beauty to our urban spaces for the long term. Nearly everything we treasure in the world's most beautiful cities was built over a century ago. Cities like Prague, Paris, and Lisbon draw millions of visitors from around the world because of their exquisite architecture, walkable neighborhoods, and human scale.

Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years—not because of traffic, population growth, or other practical hurdles, but because of ill-considered theories emerging from Modernism and reactions to it. The errors of urban design over the last century are too great not to question. The solutions being offered today—sustainability, walkability, smart and green technologies—hint at what has been lost and what may be regained, but they remain piecemeal and superficial. In *The Art of Classic Planning*, architect and planner Nir Haim Buras documents and extends the time-tested and holistic practices that held sway before the reign of Modernism. With hundreds of full-color illustrations and photographs that will captivate architects, planners, administrators, and developers, *The Art of Classic Planning* restores and revitalizes the foundations of urban planning. Inspired by venerable cities like Kyoto, Vienna, and Venice, and by the great successes of L'Enfant's Washington, Haussmann's Paris, and Burnham's Chicago, Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world. *The Art of Classic Planning* celebrates the enduring principles of urban design and invites us to return to building beautiful cities."
