students which can be accessed at any time. Each of the twenty-two tales in this enchanting collection is a surprise and a delight, melding the poignant and the possible with the outrageous, the magical, and, sometimes, the eerily haunting. Wolf men, dolphin women, defiant old ladies, and middle-aged manufacturers of erotic leatherwear -- in *Jigs & Reels* the miraculous goes hand in hand with the mundane, the sour with the sweet, and the beautiful, the grotesque, the seductive, and the disturbing are never more than one step away. Whether she's exploring the myth of beauty, the pain of infidelity, or the wonder of late-life romance, Joanne Harris once again proves herself a master of the storyteller's trade.

The official Statutes and Ordinances of the University of Cambridge. This book is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge colleges as the basis for conditional offers. They are also used by Warwick University, and many other mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. *Advanced Problems in Mathematics* is recommended as preparation for any undergraduate mathematics course, even for students who do not plan to take the Sixth Term Examination Paper. The questions analysed in this book are all based on recent STEP questions selected to address the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. Each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anybody interested in advanced mathematics. Written for the WJEC/Eduqas A/AS Level Computer Science specifications
